PROJECTS

MEDICAM

- Medicam is an early disease detection website, based on ML.
- In medicam we have to upload the scan of the MRI, then the algorithm detects whether we are detected with disease or not. if we are detected with a disease then the site shows some information about that disease.

AYURBELLA CLINIC

- Created a website for an ayurveda clinic based in Mulund, Mumbai.
- Technologies used are Html, CSS, Javascript, Bootstrap, and Django.

IMAGE TO TEXT CONVERTER

- The image-to-text converter is a website that extracts the text from a scanned image, and it downloads the text in .txt file.
- Technologies used in this project are Html, CSS, Javascript, Bootstrap, and python.
